

Satellite Radio helps me get to my place of employment every day by offering instant traffic and weather information for the major metro areas when I need it most to get where i'm going safely. I'm a consultant, so I could be in 3-4 different cities or areas per week, and the infomation on XM is invaluable. When excercising your influence, please take into consideration people like me who use XM radio to help us complete our duties in society, and in turn keep the economy strong when america needs it most.

Patiotically,

Bart Hirst
